Good to know

- **Trust the mm size.** Letters and numbers can differ between brands. Some brands make a 4.25 mm G hook, for example.
- **Old UK and Canadian sizes run backwards:** the bigger the number, the thinner the needle. Old Canadian needle sizes match the old UK numbers.
- **Steel hooks for thread** are numbered the other way too: the bigger the number, the smaller the hook.

[a] A few charts put old UK 11 at 2.75 mm and old UK 9 at 3.5 mm. [b] One chart lists a US K-10¾ hook at 7 mm. [c] Some charts list US 2½ at 3 mm and US 10¾ at 7 mm. [d] Some charts list US 17 needles as 12 mm and US 19 needles as 16 mm.
